

Systems for removing the remaining paper from butt rolls.

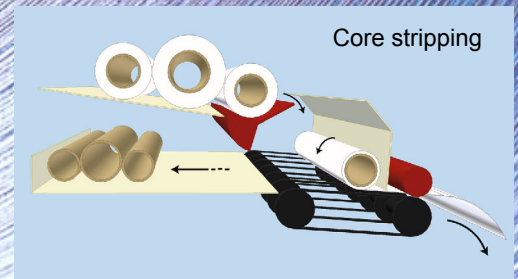

Handles all types of paper grades: fine paper, coated and uncoated paper, tissue, board, newsprint etc.

Features:

- Operates automatically without an operator.
- The core is not damaged and can be reused.

Core stripper feeding the paper to a chopper fan which blows the paper to a baler or pulper.

Core stripper feeding the paper directly to the pulper

The butt roll cutter is primarily used for tissue or when feeding to container, balers etc.

**Other Core Link products:**

Core Link has a wide range of machines for core handling and broke roll handling, such as:

- Automatic and manual core cutters
- Different accessories
- Roll cutters and roll splitters for broke rolls
- Chill rolls for extrusion coating
